Position Overview

On behalf of our client, a leading law firm in Calgary, Hammehr is seeking a Data Scientist. In this role, you will leverage your data science background to enhance, support, and innovate our client's AI applications suite, collaborating with diverse teams to develop solutions, analyze data for business insights, and continuously improve our technologies and processes.

What You'll Do

- Develop and administer cutting-edge artificial intelligence systems that enhance the functionality and user experience of our AI applications
- Utilize large datasets to inform strategic business decisions, identify key trends, and derive actionable insights
- Work closely with both IT and non-technical teams to understand business requirements and translate them into data-driven solutions
- Create and refine interactive generative chat features across our client's application suite to improve user engagement
- Regularly evaluate and improve internal processes and tools through automation and enhanced tooling to boost efficiency and effectiveness
- Liaise with external vendors and consultants to troubleshoot issues, as well as manage upgrades and maintenance of our systems
- Keep up-to-date with the latest trends and advancements in Al and data science to ensure our client's solutions remain innovative and effective

Basic Requirements

- Bachelor's degree in Computer Science, Artificial Intelligence, or related field
- Proficient in Python, Typescript, and C#
- Demonstrated ability in AI principles and practices
- Strong problem-solving skills with a collaborative team spirit
- Excellent communication abilities to convey complex technical ideas to nontechnical stakeholders

Preferred Qualifications

- Masters or PhD in field of Artificial Intelligence
- Experience with Microsoft Azure Cognitive Services, ChatGPT, and Large Language Models (LLMs)
- Proficiency in data manipulation and analysis tools

The Challenges

- This role is best for those who thrive in a fast-paced environment where you'll balance innovative projects with the need to meet critical deadlines
- Stay up to date with rapidly evolving AI and data science landscapes, applying the latest technologies and methodologies to drive innovation

Your Impact

- Lead in the adoption and implementation of cutting-edge AI technologies, making significant contributions to the client's competitive edge
- This is an environment where career growth and development are encouraged and supported by management
